### Language Lab & Communication Skill Report

Academic Year (2018-19)

The main purpose of language lab is to enhance the communication of the students. A language laboratory is an audio or audio video system used as teaching tool in language teaching. This audio video supports to language learning which is helpful to increase the confidence, in the use of target language. The language labs are generally complete learning solutions, allowing the learners to enhance all the language skills. Thus we see, language lab is systems for learning language. They are complete tool for the teachers and students that completely blend together technology and language content to facilitate language learning.

As part of language lab learning tool we used linguaphone (Digital Language Improver) in which students are encouraged to listen language from the beginning, repeat it loudly and try to speak it. In the academic year 2018-19 Department organized a Language Lab & Communication Skill program on 5<sup>th</sup> January 2019 to know the students about the concept of language lab and its use to improve their communication ability. Total 22 students participated in this program. The role of resource person played by the faculty itself. Faculty cleared the idea of language lab and guided them to operate the instrument available in the Department. The department received good feedback from the students. Thus the program ends with grant success.

**Language Lab & Communication Skill Report**  
**Academic Year (2019- 20)**

The main purpose of language lab is to enhance the communication of the students. A language laboratory is an audio or audio video system used as teaching tool in language teaching. This audio video supports to language learning which is helpful to increase the confidence, in the use of target language. The language labs are generally complete learning solutions, allowing the learners to enhance all the language skills. Thus we see, language lab is systems for learning language. They are complete tool for the teachers and students that completely blend together technology and language content to facilitate language learning.

Language lab software helps in learning the English language in an effective way. It provides technical tools for the students to learn the pronunciation of language in an easy way. It helps in learning the basic skills of the English language. The Department of English has well designed language lab and language lab software which is purchased in July 13th 2020. Before this as part of language lab learning tool we used linguaphone (Digital Language Improver) in which students are encouraged to listen language from the beginning, repeat it loudly and try to speak it. In the academic year 2019-20 Department organized a Language Lab & Communication Skill program on 22<sup>nd</sup> August 2019 to know the students about the concept of language lab and its use to improve their communication ability. Total 60 students participated in this program. The role of resource person played by the faculty itself. Faculty cleared the idea of language lab and guided them to operate the instrument available in the Department. The department received good feedback from the students. Thus the program ends with great success.

### Language Lab & Communication Skill Report

Academic Year (2016-17)

The main purpose of language lab is to enhance the communication of the students. A language laboratory is an audio or audio video system used as teaching tool in language teaching. This audio video supports to language learning which is helpful to increase the confidence, in the use of target language. The language labs are generally complete learning solutions, allowing the learners to enhance all the language skills. Thus we see, language lab is systems for learning language. They are complete tool for the teachers and students that completely blend together technology and language content to facilitate language learning.

As part of language lab learning tool we used linguaphone (Digital Language Improver) in which students are encouraged to listen language from the beginning, repeat it loudly and try to speak it. In the academic year 2016-17 Department organized a Language Lab & Communication Skill program on 10<sup>th</sup> January 2017 to know the students about the concept of language lab and its use to improve their communication ability. Total 60 students participated in this program. The role of resource person played by the faculty itself. Faculty cleared the idea of language lab and guided them to operate the instrument available in the Department. The department received good feedback from the students. Thus the program ends with grant success.
